

## The new album by Davide Campione

Last Updated venerdì, 20 aprile 2007

Dear friends,

February 10, 2007 was released my first album entitled "Piano Memories".

The CD was made entirely by me without the support of any label, and then without any production.

The album contains 15 pieces of famous Italian and international music played and arranged for piano only.

On this page you will also find a player where you can hear a preview of each track from the album.
